

**LabCompanion.net**<sup>®</sup>  
IQLS Lab network management interface

## A unique tool to **simplify** and **optimize** a One Health laboratory network management

LabCompanion (LC) is a multilingual software (SaaS) that can be used by any country to manage its national laboratory network organization and activities. It can be used on a national, regional or independent laboratory level. LC embeds a **modular** structure, with independent management of each module.

### LabCompanion modules

#### Supervision management

Keep track of all supervision, checklists, photos, recommendations

#### Training management

Management of trainings and materials, staff history, requests by labs, training types, dates, etc.

#### Equipment management

Listing of all equipment in all labs with status and age, calibration

#### Workload and shortage management

Track workload for all analysis, reasons for shortage (10-12 key analysis)

#### Dashboard and general management

Laboratory listing, activities, address book, requests

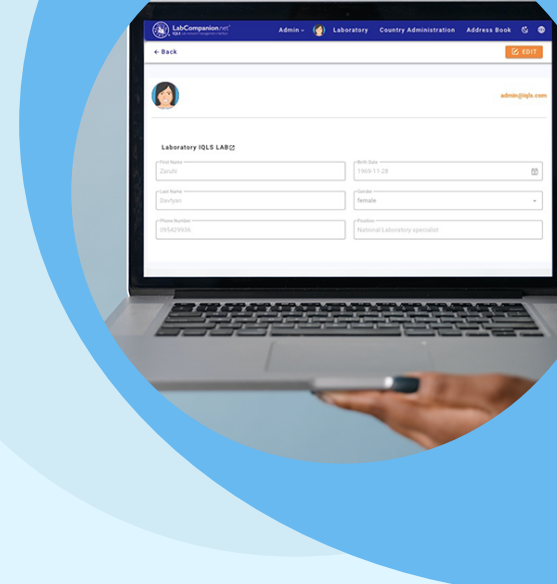

**IQLS**<sup>®</sup> INTEGRATED QUALITY
